## Live Training Courses

---

### Hyperbaric Medicine Team Training

#### Live Streaming

This 42-hour live program is approved by the Undersea and Hyperbaric Medical Society (UHMS) and the National Board of Diving and Hyperbaric Medical Technology (NBDHMT) as an introductory course in hyperbaric medicine. The course is appropriate for physicians, nurses, respiratory therapists, and technicians. The comprehensive curriculum is presented by highly experienced staff and an adjunct faculty of experts. The curriculum includes classroom instruction and practical demonstrations.

*Completion of this course meets one of the prerequisites to achieve certification in hyperbaric technology (CHT), hyperbaric nursing (CHRN), or undersea and hyperbaric medicine (UHM).*

### The Wound Care Course

#### Live Streaming

This 13-hour live program is an introductory course in wound care. It is designed to help physicians, nurses, physical therapists, and other health care professionals to understand the principles of modern, moist, interactive wound care and application of advanced therapeutic technologies. The curriculum includes classroom instruction and skills demonstrations.

### Hyperbaric Safety Director Course

#### Live Streaming

This 24-hour live program is designed to provide necessary tools and resources to fulfill the responsibilities of the hyperbaric safety director (as defined by NFPA 99). This course is appropriate for hyperbaric technologists, respiratory therapists, nurses, and physicians. The curriculum includes classroom instruction and practical demonstrations.

### Hyperbaric Facility Maintenance Course

#### Module 1 - Live Streaming

#### Module 2 - In Jacksonville, Florida

The course is intended for monoplace and multiplace chamber users; and is appropriate for hyperbaric safety directors, hyperbaric technologists, and biomedical personnel. Maintaining the hyperbaric chamber is only part of the preventive maintenance program of a hyperbaric facility. Most hyperbaric facilities include systems and components in addition to the equipment provided by the hyperbaric chamber manufacturer. This course gives participants enough information to design a comprehensive preventive maintenance program and to be an informed consumer when hiring outside maintenance work.

**Module 1** This 2-day live program includes lecture content (no hands-on). Participants receive only continuing education credit (no certificate of completion).

**Module 2 (optional)** This 1-day program requires travel to Jacksonville, Florida. Participants will perform common field service maintenance procedures that may be needed between annual preventive maintenance visits; and will have the opportunity to disassemble and reassemble various chamber components (e.g., filters, valves, and regulators) Participants receive a certificate of completion for the Maintenance Courses as well as additional continuing education credit.

### Inspection, Maintenance, and Documentation of Hyperbaric Chamber Acrylics

#### In Jacksonville, Florida

This 1-day program requires travel to Jacksonville, Florida. It addresses the care of acrylic windows on clinical hyperbaric chambers. The curriculum covers inspection and documentation of acrylics, including types of acrylic damage, and what damage requires repair by a window fabricator. There is a competency exam and a skills laboratory where participants will practice techniques for inspection, polishing, and repair.

## Online Continuing Education
